

Dear *Computer Peas* Users (whomever you are),

A new version of [Computer Peas](#) is scheduled to be posted for downloading on Sunday, February 8th. The Modesto Clarion Hotel Presidents' Day Tournament begins Thursday of that week, so the software is going through some house cleaning. There have been many changes since the last release (1.0b130), and I am hoping to have enough time from now til Feb 8th to smooth out any rough edges (or bugs) that I encounter.

I realize the holidays are coming up but if any *Computer Peas* users out there are willing to help test the program for this February 8th deadline, I would greatly appreciate it. If you would like to help, you would be receiving intermediary versions (131a, 131b, 131c, etc, until the final release version is posted (131 or to be exact, 1.0b131). For you hard-core *Computer Peas* users (you know who you are), I need your help (again).

For you casual users, well, I'm not sure who you are or if you exist, but if you're out there, give me a hollar. For you non-*Computer Peas* Tournament Directors... Come to the Modesto Pres Day Tournament to see the software in action, and, if you wish, a free quick tour of the software by its author.

Happy Holidays to All. [Eddie Brayman](#)
